Full Stack Development Immersive (2016)

Creighton University

Omaha, NE
B.A. Political Science (2009)

Experience

Senior UX Engineer, Cofounder Gibsunas Consulting (2017-Present)

- Established, maintained, documented and evangelized a multi-platform design token library independently in an enterprise environment
- Managed releases and dependencies of design system documentation site, supported non-developer contributors in Git workflow
- Authored design system team processes including intake to release workflow, defining consumer relations standards, template epics, and efficiency heuristics
- Engaged in the design process and prototyped proofs of concept in Vue for user testing while embedded in a cross-functional design group of UI, UX, content designers and analysts
- Focused on user portal interfaces, complex settings pages
- Advocated for developer experience and accessibility best practices in multi-disciplinary environments
- Executed front end feature development contracts for a variety of industries including auto loan refinancing, Fortune 100 telecom, and VR field trips using Vue and React

Software Engineer
(2017, 8 months)

Massroots

- Participated in platform rewrite, using React, Redux, and Stylus, and refactored a legacy Node API
- Encouraged accessibility, development, and styling best practices

Software Engineer
(2016-2017)

Healthgrades

- Researched, evangelized and defined ESLint standards for company project template
- Green-fielded a call center application in React, Redux, Jest

Web Development Immersive Resident
(2016, 5 months)

Galvanize

- Established a peer code review process for students
- Developed and taught 2-4 classroom lessons per week, 1:1 mentoring support

Administrative Assistant

(2009-2015) Metro Denver Partners, University of Colorado Denver

Community Engagement

- Denver Devs Community Moderator (2018-Present)
- Mentor
